SALES & PRODUCT INFORMATION

Moisture Sensor

The system utilizes electrical conductivity between measuring star wheels either side of the bale chamber

Features

- NON-INTEGRATED – this system operates through a hard-wired smartphone or tablet (Apple/Android)
- Working range between 8 - 32% humidity
- Accuracy +/- 1%
- 5 measurements per second
- Moisture is measured through the profile of the flake to achieve high levels of accuracy
- Provides live readings
- Provides average reading for the previous bale
