## SALES & PRODUCT INFORMATION

### Moisture Sensor

The system utilises electrical conductivity between measuring discs either side of the bale chamber

### Features

- NON-INTEGRATED – this system operates an App and a wired connection via tablet (Apple iOS)
- Working range between 6 - 60% humidity
- Accuracy +/- 1% < 35% humidity
- 9 measurements per second
- Moisture is measured through the outer 150mm of the bale as it forms to achieve high levels of accuracy

## SALES & PRODUCT INFORMATION

**Automatic**

**Applicator**

### Features

- 210 litre tank
- Single high capacity pump and flow meter
  - 6.6 litres/min (400 litres/Hour) restricted flow
  - Recommended for Inoculants and Balers Choice hay preservative
- Automatic adjustment of application rates for humidity, the operator must input
  - Bale weight
  - Time per bale in seconds (first bale only)

# SALES & PRODUCT INFORMATION

## Benefits – Moisture Sensor

- NO Calibration of moisture sensor when changing crops and bale density
- Extended working day = More bales
- Non-stop baling = More bales
- Moisture accuracy = High quality bales

## Benefits – Automatic Applicator

- Extended working day = More bales
- Non-stop baling = More bales
- Balers Choice hay preservative = High quality bales
- Reduced
  - Tedding passes
  - Days to make quality hay
  - Hay spoilage (using balers Choice preservative)

## Available Options

- iPad terminal with in-cab brackets
- Transfer pump
  - Safe filling of tank from ground level
